

Caroline High School Milford, VA

Caroline County Public Schools asked DGI to help them modernize a segment of the Caroline High School library into a common area where students can congregate and study in a more collaborative environment. The space now holds café tables with AC power ports and adjustable draft stools from Academia. Also included are Academia's mobile student lounges, which are semi-private work spaces complete with a desktop and AC/USB power. Finally, Media Technologies provided single and double-faced book shelving that line the walls. *The purchase was made using the KPN and NCPA Cooperative Contracts.*
